## Recommended Xerox Media for Xerox DocuColor 40/30 copier printer (EUROPE)

Revision 18, August, 2007

Last issued Feb 2007

This supersedes any previous Recommended Media for Xerox DocuColor 40/30 list.

Any additions or part number changes since the last publication are indicated in Blue print.

### Important Note:

Media recommendations made in this publication are based on qualification tests\* conducted using standard test images with moderate to heavy image area coverage. Test duration for each product/media type is based on the suggested machine monthly copy/print volume.

Test machines are maintained within specifications defined by user documentation.

\* Testing environment Temperature 23 degreesC±2, Relative Humidity 50% ±5.

In the enclosed Recommended Materials List, green shaded areas marked with an "x" indicate approved product/media type configurations. Although these configurations are recommended, reliability is based on your operating environment and application mix.

Machine reliability specifications may be affected by increased usage of Heavy Weight mode and Extra Heavy Weight mode. In addition, variances in machine reliability may occur due to extended use of some media types. Your Xerox Sales or Service representative can advise you on using Heavy Weight mode, or special application media types for long duration copy/print runs.

For specifications and a description of the various media types discussed in this publication, please refer to the Color Material Usage Guide that comes with your machine.
